PROFILE

A dedicated and enthusiastic frontend developer with a strong foundation in HTML, CSS, JavaScript, and React. I specialize in creating intuitive, visually appealing, and highly functional websites that deliver seamless user experiences. With a keen eye for design and a passion for continuous learning, I thrive on bringing creative concepts to life while staying at the forefront of evolving web technologies.

WORK EXPERIENCE

Junior Developer

RDEV   June 2024-Oct 2024

- • Designed and developed responsive websites for various clients using HTML, CSS, and JavaScript.
- • Collaborated with design teams to translate mockups into interactive, user-friendly web interfaces.
- • Ensured cross-browser compatibility and mobile responsiveness.
- Gained hands-on experience in web development technologies including React, Vue.js, and Angular.
- • Assisted in debugging and troubleshooting to improve website performance and functionality.
- Developed interactive, responsive web applications using HTML, CSS, and JavaScript.
- • Worked closely with the design team to implement front-end solutions that align with user experience goals.

Projects

Gollfff Ground Landing page
- A sleek, modern, and responsive portfolio website to showcase professional skills and projects. Built using HTML, CSS, JavaScript, and GSAP for animations. Deployed on Netlify.
  View Project: https://gollfff.netlify.app/

Education Online - Learning Platform
- A responsive web platform for online learning, offering course catalogs, user dashboards, and interactive learning modules. Built with HTML, CSS, Bootstrap, and JavaScript.
  View Project: https://educationonline1.netlify.app/

Shoes Retails - E-Commerce Website
- A modern e-commerce website for footwear with shopping cart functionality and secure payment integration.
  View Project: https://shoesreatails.netlify.app/
